

Central Timeclock Package

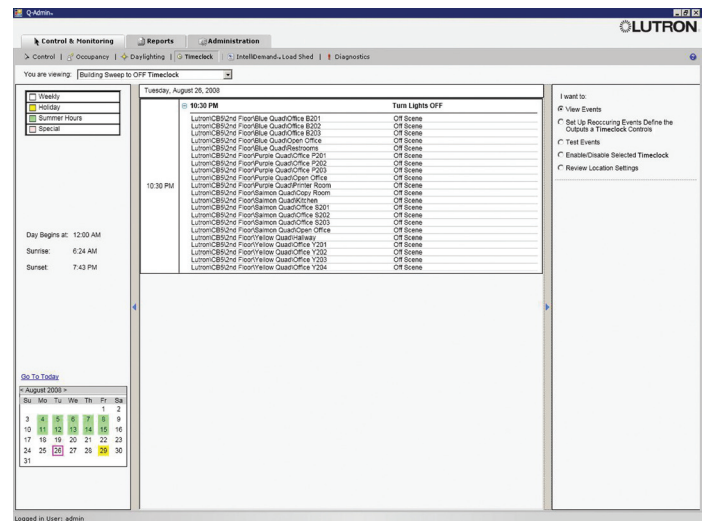

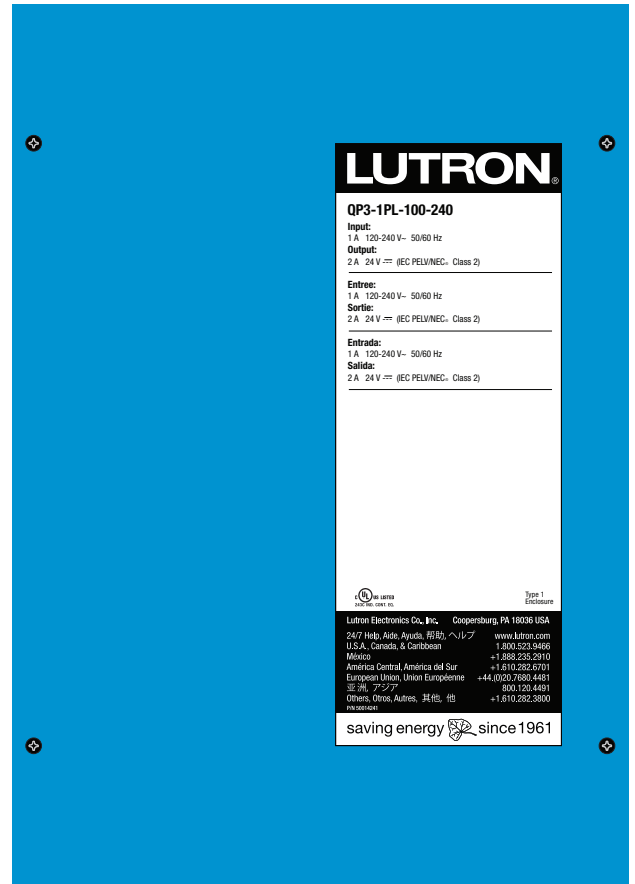

The Quantum® Select Central Timeclock Package provides projects a simple and cost effective way to save energy, reduce operating costs, meet codes, and the ability to expand their system at a later time. This package provides the ability to add a central timeclock, control, and monitoring capabilities typical of full building lighting and energy management systems to smaller, standalone QS or panel-based (GP, LP, or XP) lighting control systems.

Additional Information:

- Additional technical information about the products included in this Quantum® Select Package can be found at <http://www.lutron.com/Service-Support/Technical/Pages/ProductSpecification.aspx?syst=Whole+Building+Systems&prodn=Quantum%C2%AE>
