

Building Systems Integration Package

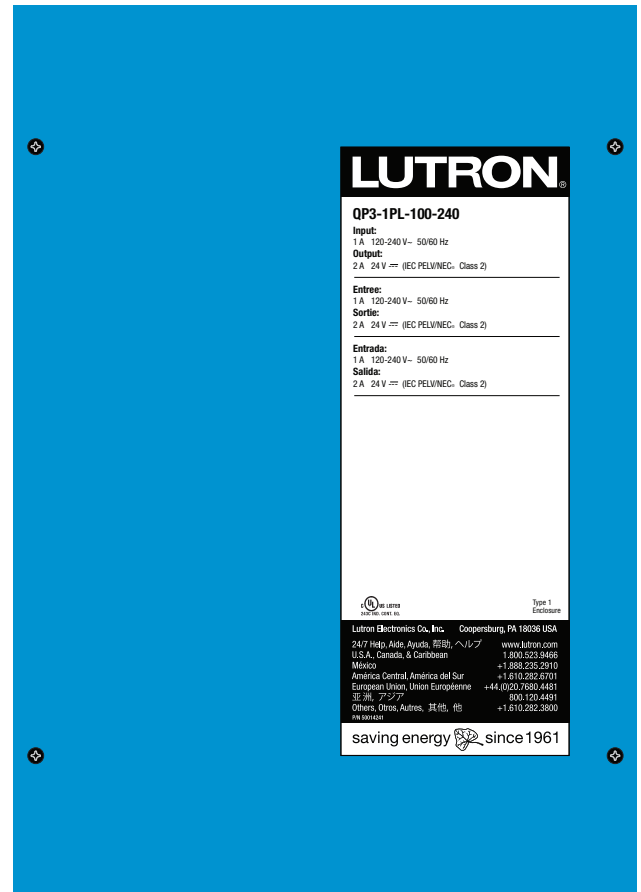

The Quantum® Select Building Systems Integration package provides a simple, cost effective way to integrate Lutron® standalone QS or Panel-based (XP, GP, or LP) lighting control systems with 3rd party Building Management Systems (BMS) via the BACnet® protocol. It allows a facility manager to control and monitor the lighting system or simply share information such as area occupancy status or energy information for reporting and other integration purposes.

Additional Information:

- Additional technical information about the products included in this Quantum® Select Package can be found at <http://www.lutron.com/Service-Support/Technical/Pages/ProductSpecification.aspx?syst=Whole+Building+Systems&prodn=Quantum%C2%AE>
- To see what information is available via the BACnet® protocol, see the Quantum® BACnet® Protocol Implementation Conformance Statements (PICS) located at <http://www.lutron.com/Service-Support/Technical/Pages/TechRefGuides.aspx?syst=Whole+Building+Systems&prodn=Quantum%C2%AE>

Package Includes:

- Model Number: **QP3-1PL-100-240** - Quantum® QP3 Series Light Management Hub, quantity 1
- Model Number: **QSW-L-PP-A** - Q-Admin™ Light Control and Monitoring Software License, quantity 1
- Model Number: **QSW-BAC-PP-A** - Quantum® BACnet® Software License, quantity 1

BACnet is a registered trademark of American Society of Heating, Refrigerating and Air-Conditioning Engineers (ASHRAE).
